Homework Policy

We believe that homework is an important part of each child’s education. It fosters independence and increased responsibility on the part of the student.

Homework will be:

- Determined by the classroom teacher and clearly communicated to parents and students in September
- Relevant to classroom instruction
- Used to complete unfinished daily work
- Occasional special projects
- Recreational reading
- Skill practice in any area

Organizational skills will be emphasized, with an emphasis on self-discipline development. The emphasis will be on completion, rather than duration. The assigned work will be clearly communicated to the student, and parent assistance will be limited. Parents are expected to communicate any concerns or feedback regarding homework to their child’s teacher.
