

Dear Parents,

For remote online learning opportunities, your child can use Lexia® Core5® Reading—a fun, computer-based program that has helped millions of students improve their literacy skills. The activities in Core5 support and build on your child’s classroom curriculum and focus on developing reading skills in six areas: phonological awareness, phonics, structural analysis, fluency, vocabulary, and comprehension.

Here’s how Lexia Core5 Reading works:

- Your child begins Core5 at a starting point that fits his or her needs and then engages in online activities throughout the week.
- ***The first time a student logs on, if they have never been on the program before, they will take an Auto-Placement test.***
  - The auto placement test will occur only the first time a student logs in
  - The test will take about 20 minutes to complete
  - Once the auto placement test is complete, instruction will begin at their instructional level
- ***If a student was using the program previously at school, they will continue their instruction where they left off.***
  - Online activities include direct instruction and immediate feedback as your child learns new skills.
  - Progress and performance in the program are saved and available to your child’s teacher.
