## WHEN I FEEL SICK

People are worried about COVID-19, also called the coronavirus. I might get sick. If I get sick, I will have a fever. I will have a cough.

If I get sick or if someone I know gets sick, I will need to stay home. I need to tell an adult as soon as I feel sick.

If I have a cough, I will cover my cough with my elbow or with a tissue. I can take medicine to make me feel better. If it is hard for me to breathe, I will tell an adult and I might have to go to the doctor.

I will keep personal space from my family and other people in my house to keep them healthy. I will probably feel tired and sleep a lot.

If I get sick, my immune system will work to make me healthy again. I can get healthy faster by having good hygiene, taking my medicine, and keeping my personal space.
