

McLean STEM Night & Career Fair

Thursday, November 29, 2018

McLean students will participate in a Career Fair to encourage their exploration of a career of their choice. Students will also consider how STEM (Science, Technology, Engineering or Mathematics) is evidenced in their chosen career.

General Guidelines

1. Participation is required for **all** McLean students and will count as a science & English/Language Arts grade for the quarter. Siblings may not do joint projects. Projects should be a product of students' own effort, ideas and work.
2. Students will choose a career that interests them. They will create a display to:
 - Explain the responsibilities of this job
 - Exhibit photos of them dressed up for that career
 - Explain how science, technology, engineering or math are used in this career
3. Completed projects will be brought to school **Thursday November 29.** Students will present their project in class after which projects will be **displayed** all day and during our evening STEM Night celebration. Students may come to school dressed as their career choice that day.
4. Display area will be no greater than 3 feet wide x 15 inches deep. This will accommodate a typical tri-fold display board. Projects must be labeled with name & classroom teacher.
5. Each student will receive a brag tag for their participation.

Tri-fold boards are available at Dollar Tree as well as other stores. Or you can cut your own out of cardboard.

Below is a suggested format for the tri-fold board:

<i>Dream</i> My career choice	<i>Believe</i> Photos of me in this career	<i>Achieve</i> How this job uses STEM
