

WPS-PERSONAL

- Users can have a **maximum of 5** registered devices.
- Upon registering a 6th device (and so on) the oldest registered device of theirs will be purged.
- Devices that have been off the WPS_PERSONAL network for over 30 days will be purged and need to be re-enrolled.

Enrolling Personal Devices and Connecting to WPS_PERSONAL.

| | |
|--|--|
| <ul style="list-style-type: none">• On your mobile device navigate to your Wi-Fi settings and select the WPS_PERSONAL network. Your default browser will automatically open and redirect you to the following portal where you will need to enter your district credentials. Click Sign On when ready. |  <p>The screenshot shows a web portal titled "Device Registration" with the Wichita Public Schools logo. Below the title, it says "Please enter your district network credentials." There are two input fields: "Username:" and "Password:". At the bottom, there is a blue button labeled "Sign On".</p> |
| <ul style="list-style-type: none">• Read the Acceptable Use Policy, and if you agree to the terms, click on Accept to continue. |  <p>The screenshot shows the same "Device Registration" portal. Below the sign-on form, there is a section titled "Acceptable Use Policy" with the text "Please read the Acceptable Use Policy". A scrollable text area contains the policy details: "Please accept the policy: You are responsible for maintaining the confidentiality of the password and all activities that occur under your username and password. Wichita Public Schools USD259 offers the Service for activities such as the active use of e-mail, instant messaging, browsing the World Wide Web. High volume data transfers, especially sustained high volume data transfers, are not permitted. Trying to access someone else's account, sending unsolicited bulk e-mail, collection of other people's personal data without their knowledge and interference with other network users are". At the bottom, there are two buttons: a blue "Accept" button and a grey "Decline" button.</p> |

- Once logged in you will receive the following message. Click **Continue** to proceed with network access.

- After gaining network access your browser should automatically re-direct you to the USD259 webpage which contains district certificates and install instructions.
- ***** You **will** need to install the certificate appropriate for your device (Android/ios) to avoid certificate errors while browsing.

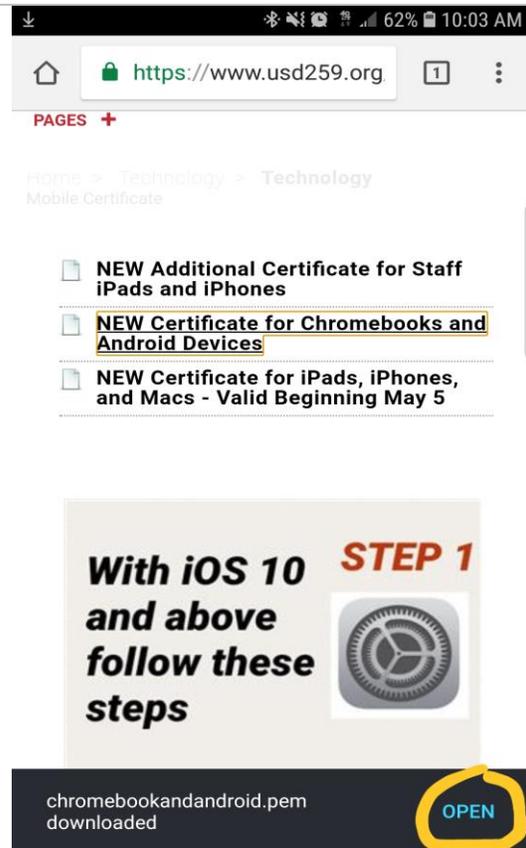

- ***** If you are not automatically re-directed, open the mobile device browser and visit <https://www.usd259.org/Page/8914>.

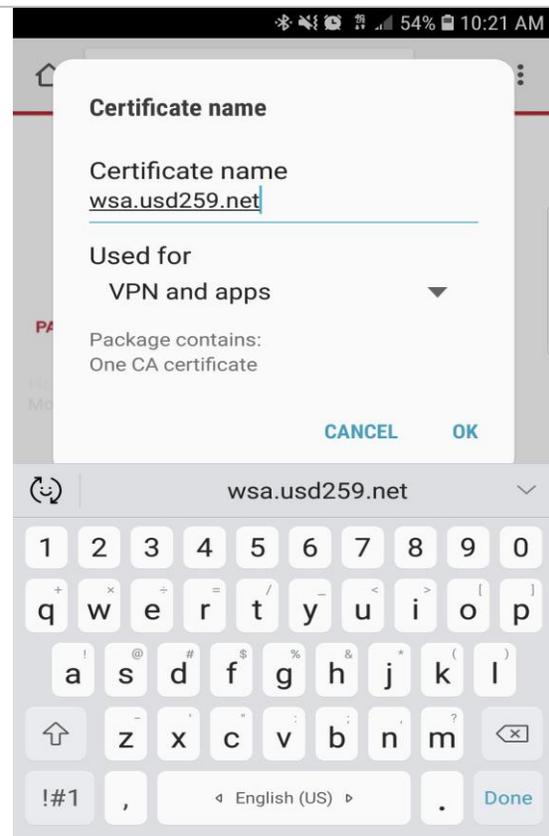

Installing Certificates - Android

(Some settings may look different based on the Android version you are using)

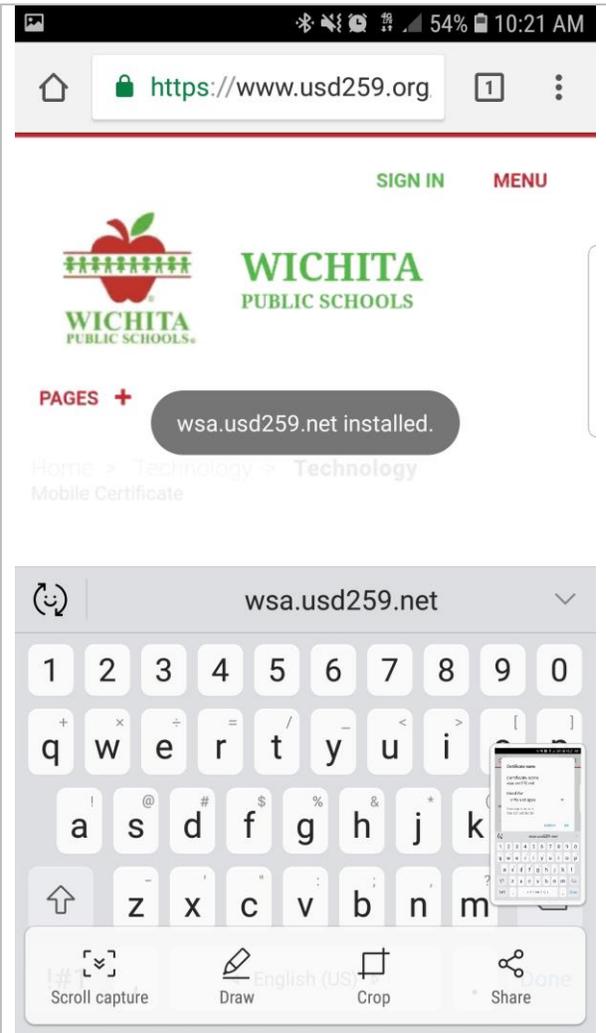

- For Android devices select “NEW Certificate for Chromebooks and Android Devices”.
- Select “Open” once the download is complete.

- You will get be prompted to enter a certificate name. Type wsa.usd259.net and select “OK”.

- You should now see an install confirmation message.

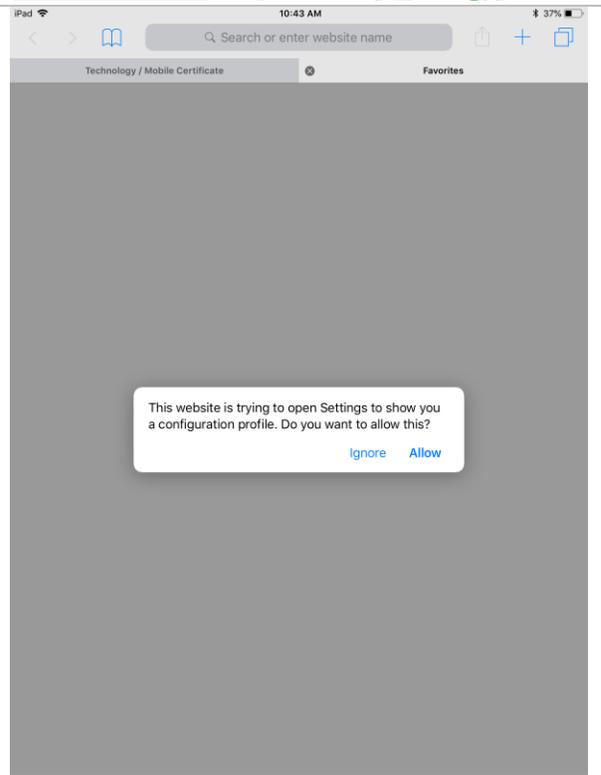

Installing Certificates - iOS

(Some settings may look different based on the iOS version you are using)

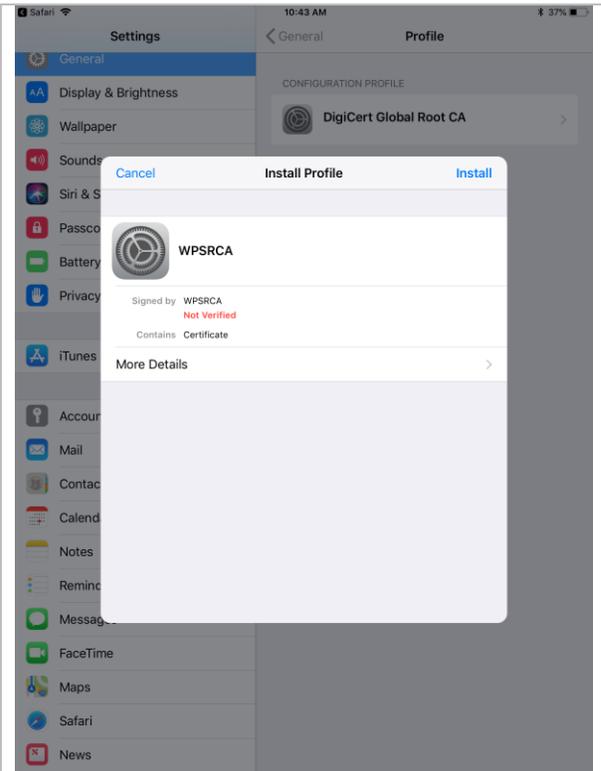

- On the USD259 Mobile Certificates webpage (<https://www.usd259.org/Page/8914>), select “NEW Certificate for iPads, iPhones, and Macs – Valid Beginning May 5”.

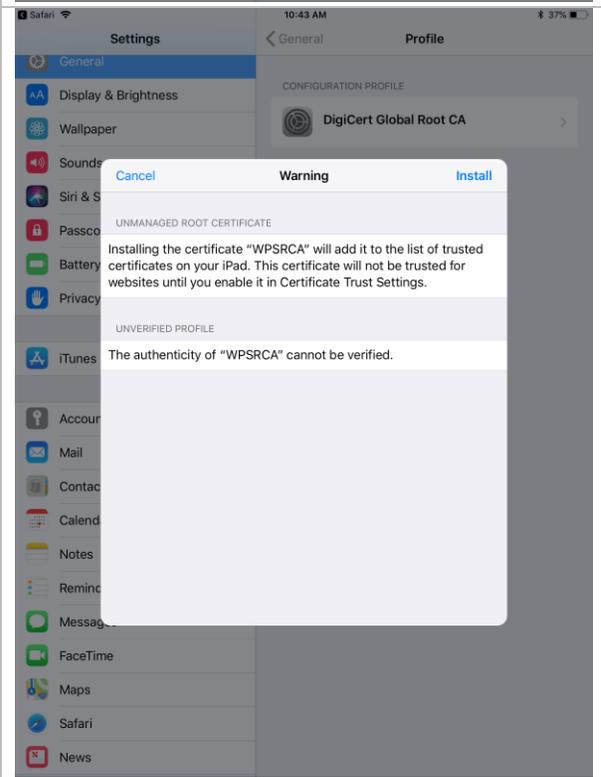

- You will be re-directed to the following page. Select “Allow”.

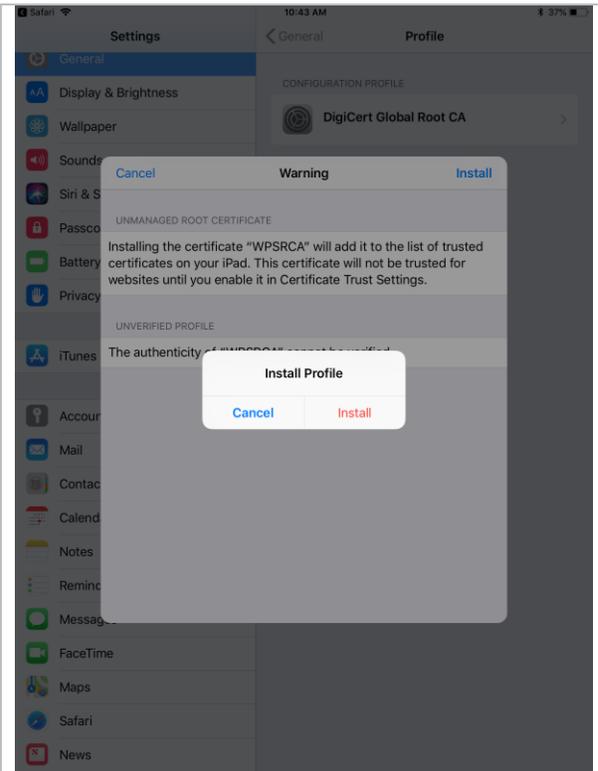

- Select “Install” on the upper right hand corner.

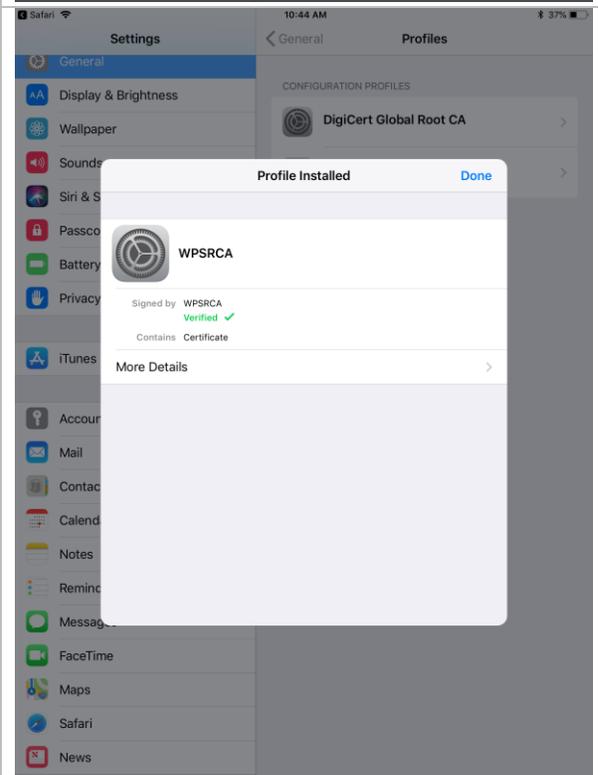

- Again select “Install” on the upper right hand corner.

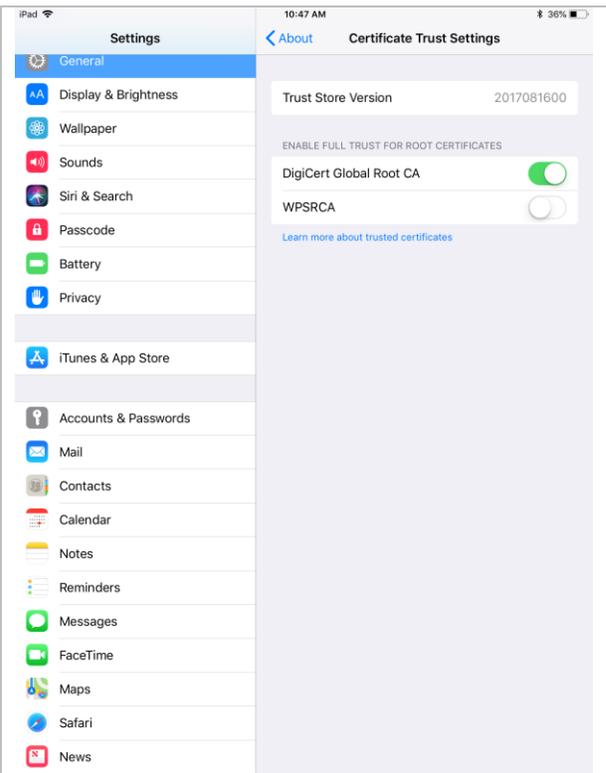

- Select “Install” one last time to confirm the certificate profile install.

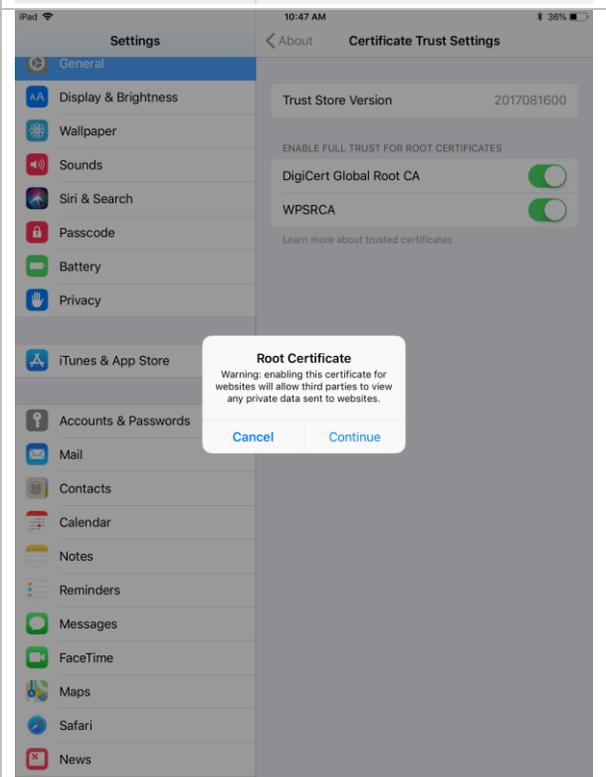

- Select “Done”.

- You'll now need to "trust" the installed certificate by navigating in the iOS settings to: General>About-Certificate Trust Settings.
- Look for "WPSRCA" and enable it.

- To complete the process select "Continue".

***This process will only need to be completed once for each personal device needing to connect to the network unless the device has been off network for over 30 days, after which will need to be re-enrolled. Each user is allowed to enroll up to 5 personal devices. The oldest enrolled device will be automatically removed prior to adding a new one once the limit is reached.
