

STEALTH Spotlight (September '22)

Math, autumn gardening and more at Adams Elementary

Adams STEALTH is in 'Fall' Swing!

Happy Fall to everyone!

We are proud to announce that the WPS STEALTH Afterschool Program is well underway at all 9 of our sites this school year. Students and staff have already been working on amazing, innovative projects that contribute to their academic as well as social/emotional success! At Adams Elementary, site coordinator, Ms. Magdaleno has reported that already, students are immersed in numerous activities that encourage improvement in their math skills by using fun games! In addition to a budding interest in math and science academic enrichment, Adams STEALTH students are also tending to an actual vegetable/flower garden in their school's courtyard, which features sunflowers, tomatoes, herbs and more! We are so excited to see what other exciting things Adams will do this semester! Please enjoy the pictures that Adams has provided of what their program has been up to so far!

Did you know...?

Stay Connected! You can keep up with STEALTH Afterschool on multiple platforms! Facebook and the WPS District Website both provide monthly updates on the happenings of our 9 separate sites!
